Case Study - North Staffs UHNS Trust PFI

In Early 2012 Bespoke Concrete were approached by Colour Urban Design to assist in the design and specification for the new North Staffs UHNS Trust PFI. The project required a variety of Bespoke Concrete elements with specific design, concrete chemistry and finish options.

The units for the project included:

- Planters at two main sizes and one custom sized to fit on site dimensions once others were fixed.
- Benches with custom designed cast in fittings and ductwork for LED lighting
- **Curved and Straight Walls**
- Kerbs
- Boot planter kerbs with and without custom light fitting points and drainage recesses.

Bespoke Concrete took the initial design concept and worked with it to optimise the design to achieve the highest quality units on time and on budget.
